

Auto Body Painting and Refinishing 1 & 2

9.23

- Prepare for entry-level positions in the Automotive Body, Painting, and Refinishing Industry from a Certified Instructor
- Explore and discover shop operations, tool usage, safety procedures, equipment operation and customer service

Students will develop the skills required to be successful in the auto-body repair, painting and refinishing industry. They will learn to identify materials, tools, and equipment and to use them with a high level of efficiency and safety. Students will learn body work, MIG welding, original equipment manufacturer (OEM) finishes and custom painting.

Integrated throughout the course are career preparation standards, which include workplace basic skills and behaviors, career technical skills, and job employment skills.
