

Fire Technology

9.23

- UC Area "F" Credit
- Earn Las Positas Credit
- Learn to work with fire engines, fire-fighting equipment, and tools through hands-on training
- Discover and learn about fire service careers

Students learn the core skills needed for a Fire Service career. They will receive basic firefighter training in causes of fires, safety procedures, basic rescue procedures, fire suppression techniques, fire hose operations, ladder operations, and many other areas necessary to prepare students for further training and employment in the fire service. Students will gain basic firefighting knowledge and manipulative skills through hands-on training that will lead to advanced training and AHA, CPR, and FEMA certification. Characteristics such as honesty, integrity, responsibility will be emphasized.

Students will develop their firefighting skills while: working independently and as part of a team, through leadership training and peer training, giving class presentations, and may participate in community events. They will learn inventory control, equipment setup, and fire engine operation.
